

For Immediate Release

25 June 2009

RED BOOK® - NEW EDITION PROVIDES THE LATEST ADVICE ON OVER 200 CHILDHOOD INFECTIOUS DISEASES

With measles cases at their highest level for over a decade, recent closures of schools to prevent the spread of swine flu, sinus infections causing toxic shock in children, the rapid rise in STIs, and the falling levels of immunization, every paediatrician, doctor, general practitioner, and even health care worker will want to have the latest edition of *Red Book®* - the gold-standard paediatric infectious diseases problem-solver.

The latest guidance for medical professionals on treatment of the most common health threats to children and adolescents comes from the American Academy of Pediatrics in the latest edition of *Red Book®*.

Red Book®, from the American Academy of Pediatrics Committee on Infectious Diseases has become the essential resource and reference for clinical practice around the world. The new 28th edition is available in the UK and Europe from Eurospan Group from the end of June.

The 2009 edition of *Red Book®* is also available in an online edition and can for the first time now be delivered directly to mobile phones to provide health professionals with instant access to *Red Book®* at the point of care.

Developed by the AAP Committee on Infectious Diseases in conjunction with the CDC, the FDA, and other leading institutions with contributions from hundreds of physicians, the newly revised and updated 2009 *Red Book®* continues the tradition of excellence with the latest findings and clinical guidelines on the manifestations, etiology, epidemiology, diagnosis, and treatment of more than 200 childhood conditions.

2009 Red Book® Content Highlights

- Key developments in combination vaccines
- 2009 AAP standards for child and adolescent immunization practices
- The latest on common misconceptions about immunizations
- Revised section on vaccine contraindications and precautions
- The latest on pregnancy and the human papillomavirus (HPV) vaccine
- Updated recommendations for routine screening of pregnant women for HIV
- The latest on sexually transmitted infections (STIs) in adolescents and children and recommendations for use of HPV vaccine
- Updated coverage of Adenovirus, Anthrax, Arboviruses, Candidiasis, *Clostridium difficile*, Enteroviruses, Epstein-Barr Virus Infections
- New chapter on *Fusobacterium* infections
